Role of the Pilot Investigator

Capt. Gary Parata
Vice-Chairman, Accident Analysis and Prevention Committee, International Federation of Air Line Pilots’ Associations
Pilot Investigators

- What are they?
- Where do they come from?
- What value do they bring? (Why?)
- Why are there *perceived* pitfalls? (Disadvantages)
What is a Pilot Investigator?

- Current and active Line pilots (no other duties preferred)
- Trained investigators
Where do Pilot Investigators Come From?

IFALPA

ANZSASI Safety Seminar 2008, Adelaide, SA
What is IFALPA

- A grouping of national Pilots’ Associations into an international body
- Nearly 100 countries – Ecuador became the 97th member state in 2007
- Over 100,000 pilots

ANZSASI Safety Seminar 2008, Adelaide, SA
Aim...

- To develop and promote a common pilot viewpoint on
  - Technical developments in aviation
  - Air safety objectives
  - International standards and regulations governing air transport operations
Specialist Committees

SAFETY & TECHNICAL

- Accident Analysis
- Air Traffic Services
- Aircraft Design & Operations
- Airport & Ground Environment
- Dangerous Goods
- Flight Engineers
- Helicopters
- Security

PROFESSIONAL AFFAIRS

- Human Performance
- Industrial
- Legal

ADMINISTRATIVE

- Admin & Finance

ANZSASI Safety Seminar 2008, Adelaide, SA
Accident Analysis and Prevention Committee

- Chairman - Capt Gavin McKellar (South Africa)
- Vice-Chairman - Capt Gary Parata (New Zealand)
- Vice-Chairman - Mr Juan Carlos Lozano (Spain)
- Technical Officer - Mr Arnaud du Bedat

Next Meetings
Barcelona 7-10 May 2008
Bali 15-19 October 2008

ANZSASI Safety Seminar 2008, Adelaide, SA
Accident Analysis and Prevention Committee

- Review of Accidents
- Review Safety Trends
- Review of ICAO and IFALPA Policy in Annex 13

Hot Issues
- Proceedings against Flight Crew following an Accident or Incident
- Disclosure of accident investigation records and data

ANZSASI Safety Seminar 2008, Adelaide, SA
The Focus

“Just Culture”
flight data analysis and protection
safety management systems
role of the pilot investigator
truly independent investigative agencies
judicial inquiries separate and secondary to the technical investigation
upgrading of “Serious Incident” investigations to an ICAO Standard
States to implement ICAO SARPS

ANZSASI Safety Seminar 2008, Adelaide, SA
ANZSASI Safety Seminar 2008, Adelaide, SA
Safety & Technical Strategic Objectives

- to protect and enhance aviation safety by promoting a single level of safety world-wide

  F Representation
  - to promote pilot opinion to aviation regulatory authorities

  F Accident & Incident Reporting and Investigation

  F Deficiency Reporting

  F Education & Training

ANZSASI Safety Seminar 2008, Adelaide, SA
Sceptic or Visionary?

These guys simply want to protect the pilots

ANZSASI Safety Seminar 2008, Adelaide, SA
Minimum Requirements for Accredited Pilot Investigators

- Must be nominated by their member association
- Normally, must have attended an IFALPA approved school, eg Cranfield, USC, IFSA, SCSI, SAA
- Applicants screened by Accident Analysis Committee then referred to Executive Board for accreditation
- Once accredited, letter of introduction sent to State Minister/Secretary
ACREDITED ACCIDENT INVESTIGATOR

The Bearer of this card is an accredited and fully authorised Accident Investigator of the International Federation of Air Line Pilots' Associations (IFALPA).

The Federation will appreciate any and all courtesies which are extended to the bearer of this card to facilitate the performance of their duties as an IFALPA Accredited Accident Investigator. and respectfully requests that they be admitted to the scene of any airline accident, investigation or related hearing.

Dennis J. Helen
PRESIDENT

IFALPA, Interpilot House, Gogmore Lane, Chertsey, Surrey, KT16 9AP, UK.

ANZSASI Safety Seminar 2008, Adelaide, SA
Re-accreditation

- Accreditation lapses automatically after five years
- Re-accreditation requires:
  - Continuation of active flight crew member status
  - Written approval of member association
  - Demonstrated continued involvement in accident investigation
Continuation Training

- IFALPA Safety Seminars held twice a year
  - Hong Kong, November 2005: Technical Witness Training
  - Rome, June 2006: Media Training
  - Rio de Janeiro, October 2006: Blood-borne Pathogen refresher

ANZSASI Safety Seminar 2008, Adelaide, SA
IFALPA Safety School

- IFALPA does not train investigators, they are accredited
- IFALPA does however, train Accident Prevention Advisors at the ISS
  - APA’s speak to industry on accident prevention
  - Training includes systems approach to safety, media relations, flight data analysis and LOSA

ANZSASI Safety Seminar 2008, Adelaide, SA
Why should Pilot Investigators be accepted?

- Outside specialists are regularly brought in, why can’t they be line pilots?
- Active pilots best experts on day-to-day operating of aircraft – valuable resource!
- Pilots should have as much right as aircraft operator or manufacturer to participate
- IFALPA Accident Investigator accreditation is not easy to get
A Big Why...

- Pilot Investigators are servants of only one master - the Investigator-in-Charge
- Other outside investigators serve two masters – the IIC and their own CEO.
Perceived Disadvantages

- Partisan view
- Unduly complicate or compromise investigation
IFALPA has two interests whenever there is an accident

- The COLLECTIVE interest (IFALPA accredited investigators)
  - Adequate safety outcomes

- The INDIVIDUAL interest (Pilot’s Friend)
  - Medical
  - Legal
  - Industrial
  - Welfare
The Reality Is....

- IFALPA-accredited investigators play no role in legal, industrial, medical, or welfare issues.
- IFALPA has other specialists for those roles, including e.g. “pilot’s friend”.
- There is a well-defined separation between the support and the investigative roles.
Q. You find a half-drunk bottle of whisky in the Captain’s flight bag. You:

- A. Hide it
- B. Drink it
- C. Report the find immediately to your Group Chairman or IIC
- D. None of the above

ANZSASI Safety Seminar 2008, Adelaide, SA
What do you do?

- Take Photographs
- Document the find (Dictaphone, written)
- Include in your Daily Activity Report to your Group Chairman
- In other words, do what you should NORMALLY do with most any find
Summary

- IFALPA accredited accident investigators will enhance any investigation – not hinder it
- If you use a pilot investigator – make sure they have IFALPA accreditation!
